

WordPress Careers plugin

wpCareers (JobPortal Project) is a WordPress plugin

The plugin allows you to build an online jobs/resume website, where the applicants will be able to search, update, add/remove, and add or edit their resumes/profiles.

In addition, user can also add/delete/change descriptions, upload images/photos.

- * In Admin Area the administrator will be able to:
- * View and manage records in terms of add/modify/remove of entries
- * Approve or deny the posts.
- * Inactive Applicants Convert to Active
- * Delete Users profile, Delete Employer profiles

It is a complete ready to use as Job Board System

IMPORTANT NOTE:

We strongly recommend you using themes that the front page will be displayed in one column otherwise you use our theme wpcareers.

Installing the plugin

Please test the plugin with your theme on a develop machine or a local machine, if the test is successful then install it on the production machine.

1. Extract files
2. Upload 'wpcareers/' folder to your './wp-content/plugins/' directory
3. Login to the administration and go to "admin panel/plugins" and activate the plugin
4. Go to the "Manage" tab of your WP.

You have now there a new tab called "wpcareers" to configure the plugin.

You will need to make the following folders writeable (chmod 777):

- wp-content/plugins/wpcareers/templates_c
- wp-content/plugins/wpcareers/cache

NEW in THE VERSION 1.1

Add a public directory and upload the resume and images resources

(the public folder must have write permission)

- wp-content/public/wpcareers/resume
- wp-content/public/wpcareers/public
